

## Results Breakout Session Work Team 'Instruments & Implants Marking'

Paris, France - September 22nd, 2006  
Volker Zeinar

The global language of business

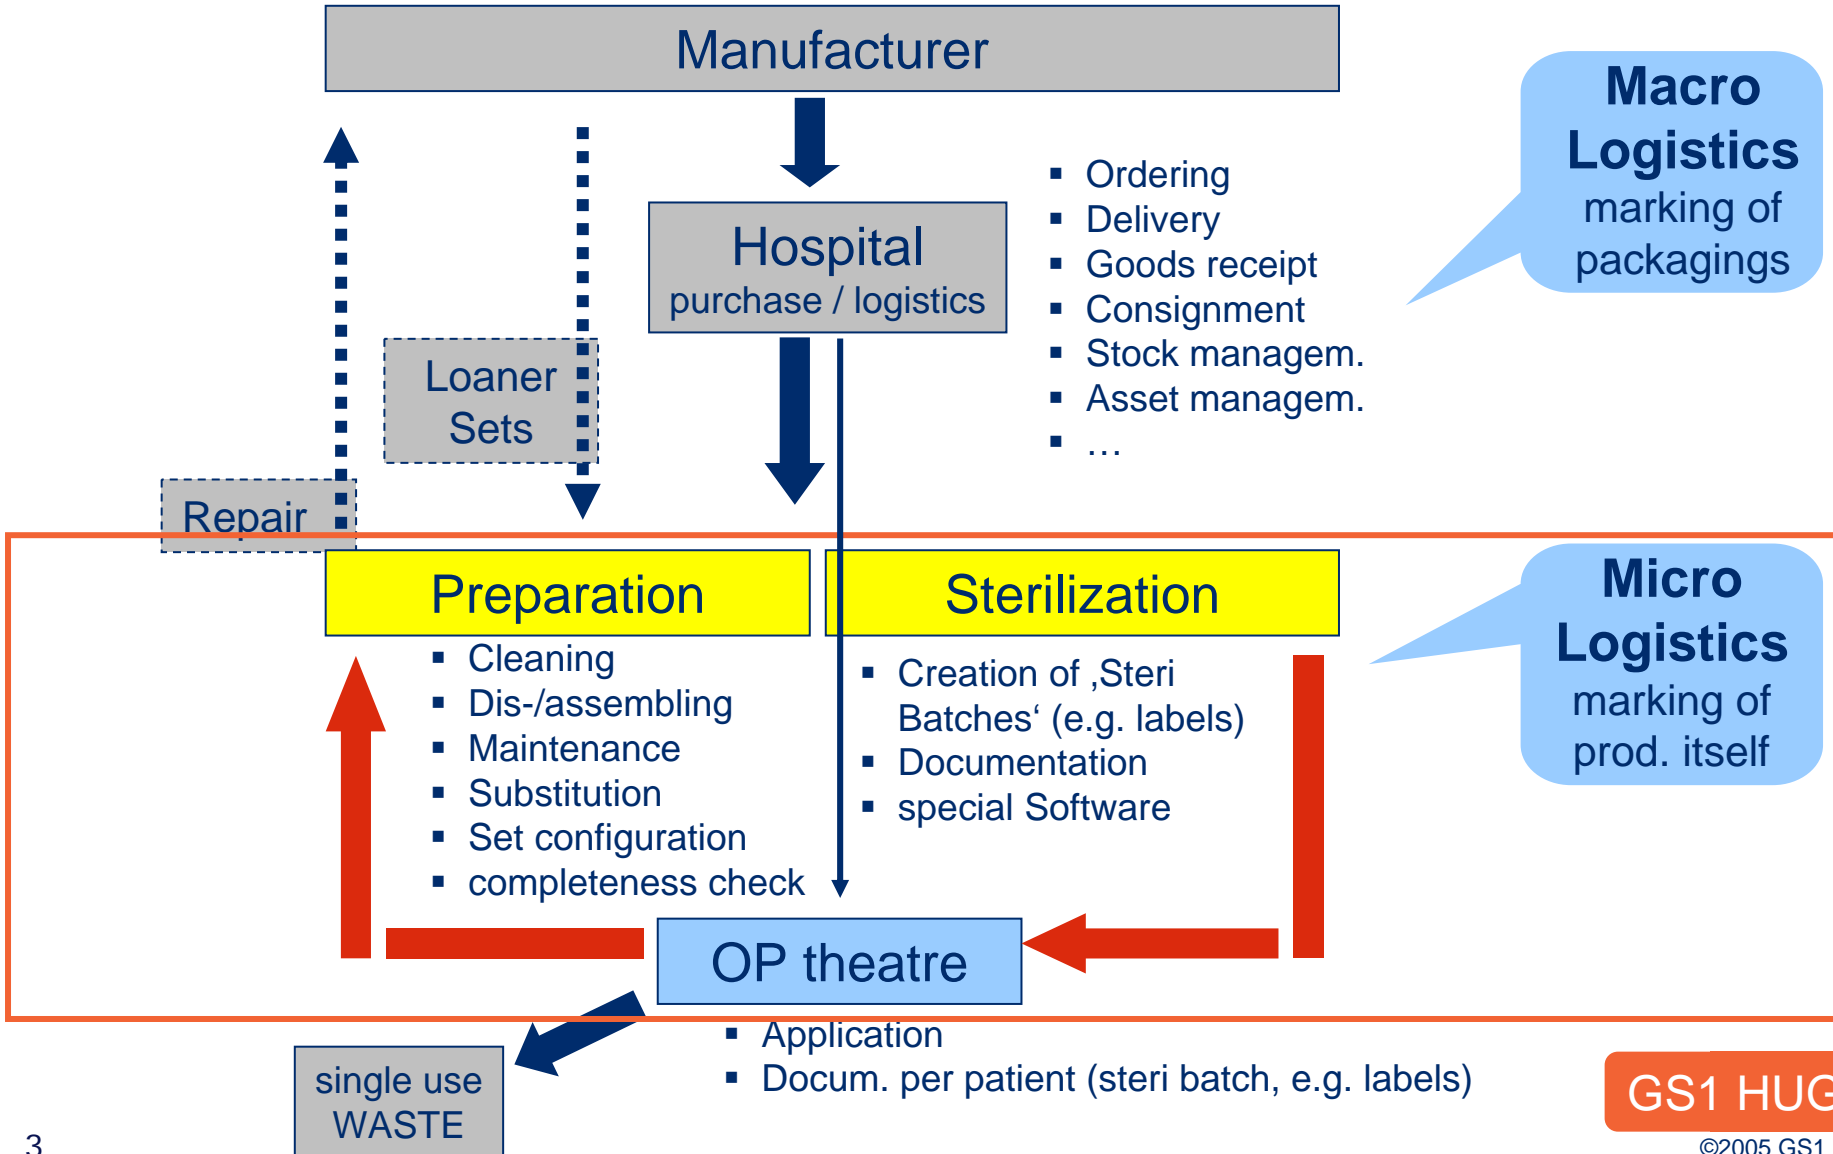

[www.gs1.org](http://www.gs1.org)

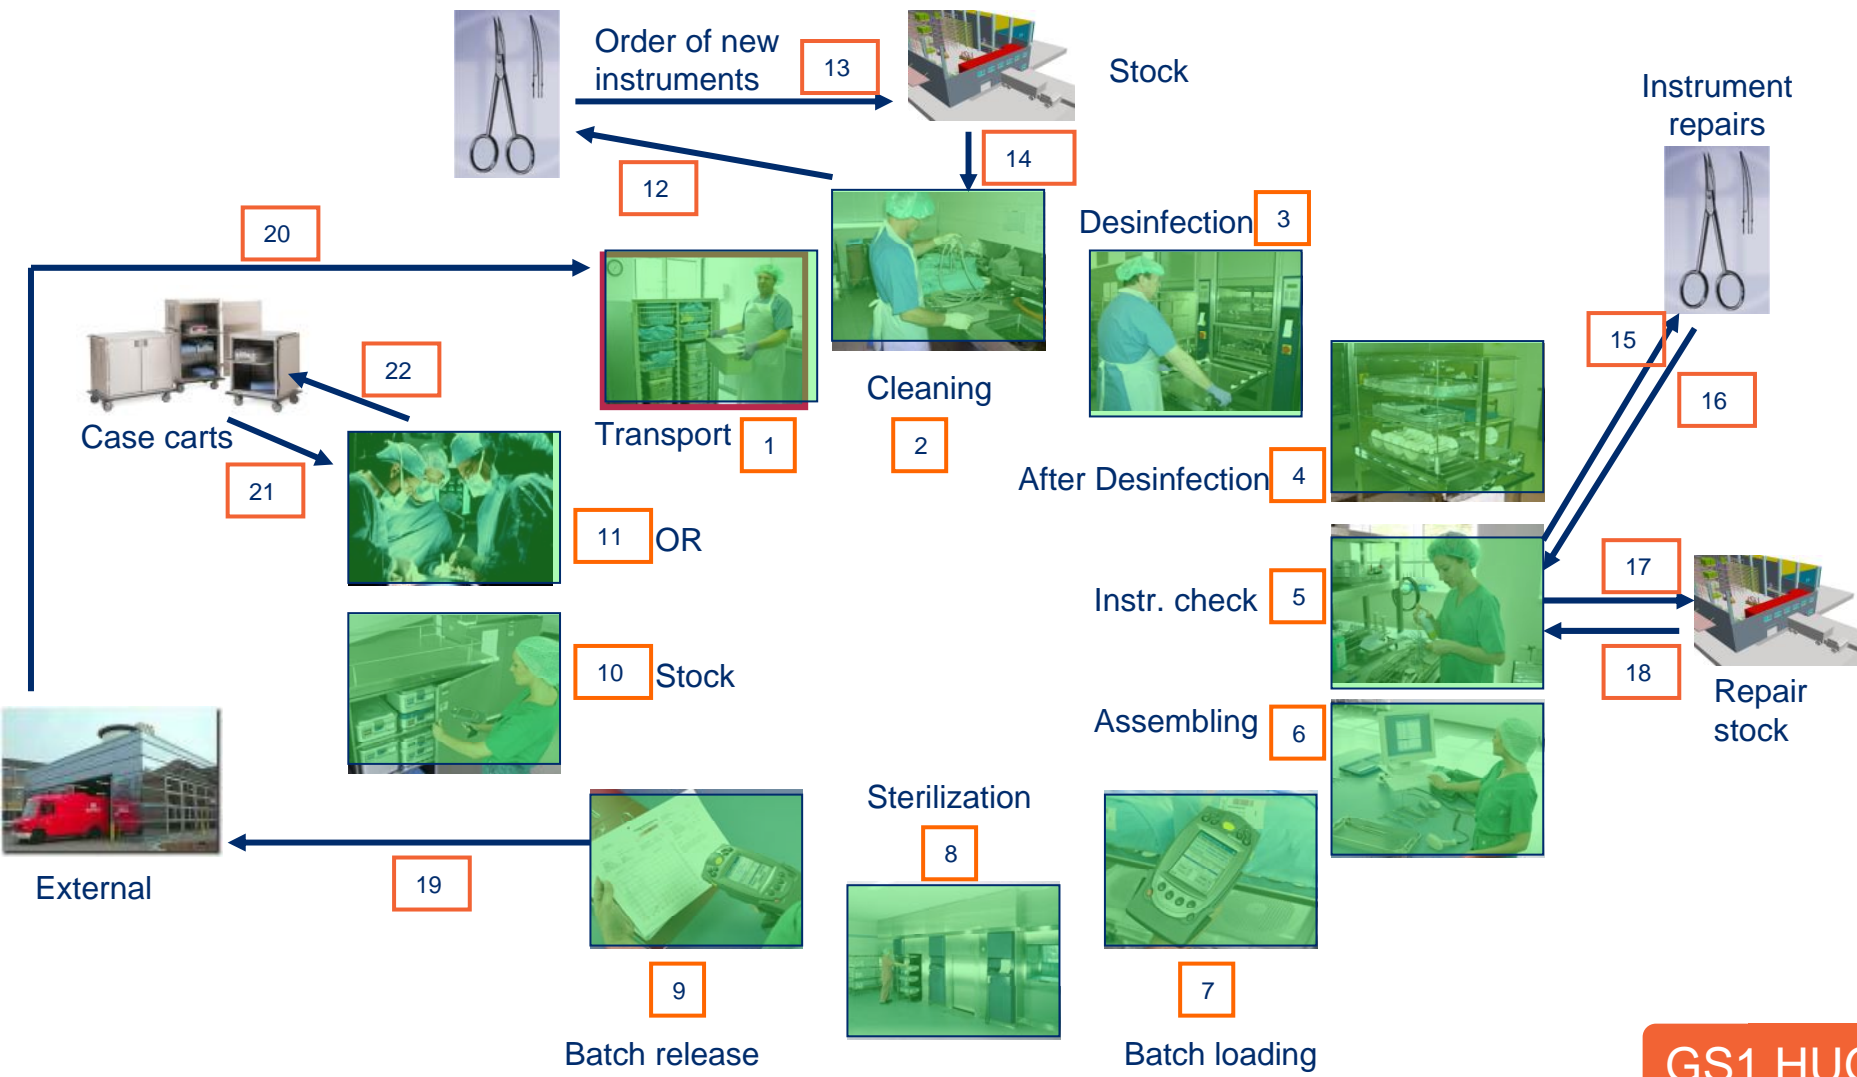

- ❑ **presentation Olympus Tokyo ,Track+Trace‘ pilot University Hospital Osaka**
  - findings confirmed experiences from Europe
- ❑ **WT agreed that :**
  - business needs to track+trace on single instrument level are existing
  - space is an issue at direct marking
    - as less characters as possible the better (unique item identification)
- ❑ **start discussion regarding ,business needs**
  - guided by Tom Heist !
- ❑ **get ,business requirements template‘ (Tom Heist) → end of Sept.06**
  - incl. statements of WT session (21.09.06)
- ❑ **forward to WT members → first week of Oct.06**
  - supplement further requirements (consider complete SC process)
  - feedback required until 22.10.06 (all WT members)

# Instruments Cycle

# Micro Logistics (no. according to the questionnaire)

## Next steps

- ❑ **Transmit findings from personal interviews (30) to the template**
  - Christian, Gunther, Volker → until end of Oct.06
  - supplement with feedback from WT members
  
- ❑ **forward supplemented document to WT members + Eucomed ETF**
  - feedback required until 20.11.06 (WT members)
  - ETF 10.12.06
  
- ❑ **forward completed ,business requirements document‘ to WT Auto-ID-Data (input for Berlin meeting)**
  - organize a WT session at the Hosp. Dijon → finalize document (???) (Dec. 06)
  
- ❑ **WT members ,I+I‘ will become members of ,Auto-ID-Data‘**
  - Berlin conference

*Thank you for your attention !*
