RESAH STRENGTHENS PATIENT SAFETY THROUGH DATA QUALITY

GS1 France

resah
Réseau des Acheteurs Hospitaliers

## A major actor in healthcare and among French GPOs

Over 600 suppliers
(40% are SMEs)

3,500 framework agreements
in 10 industries

320 care providers members,
including the French Army Medical Service (SSA)

How do health professionals receive product data so far?

Multiple proprietary databases supply health professionals with non standard product data. Data do not come from the brand owners.
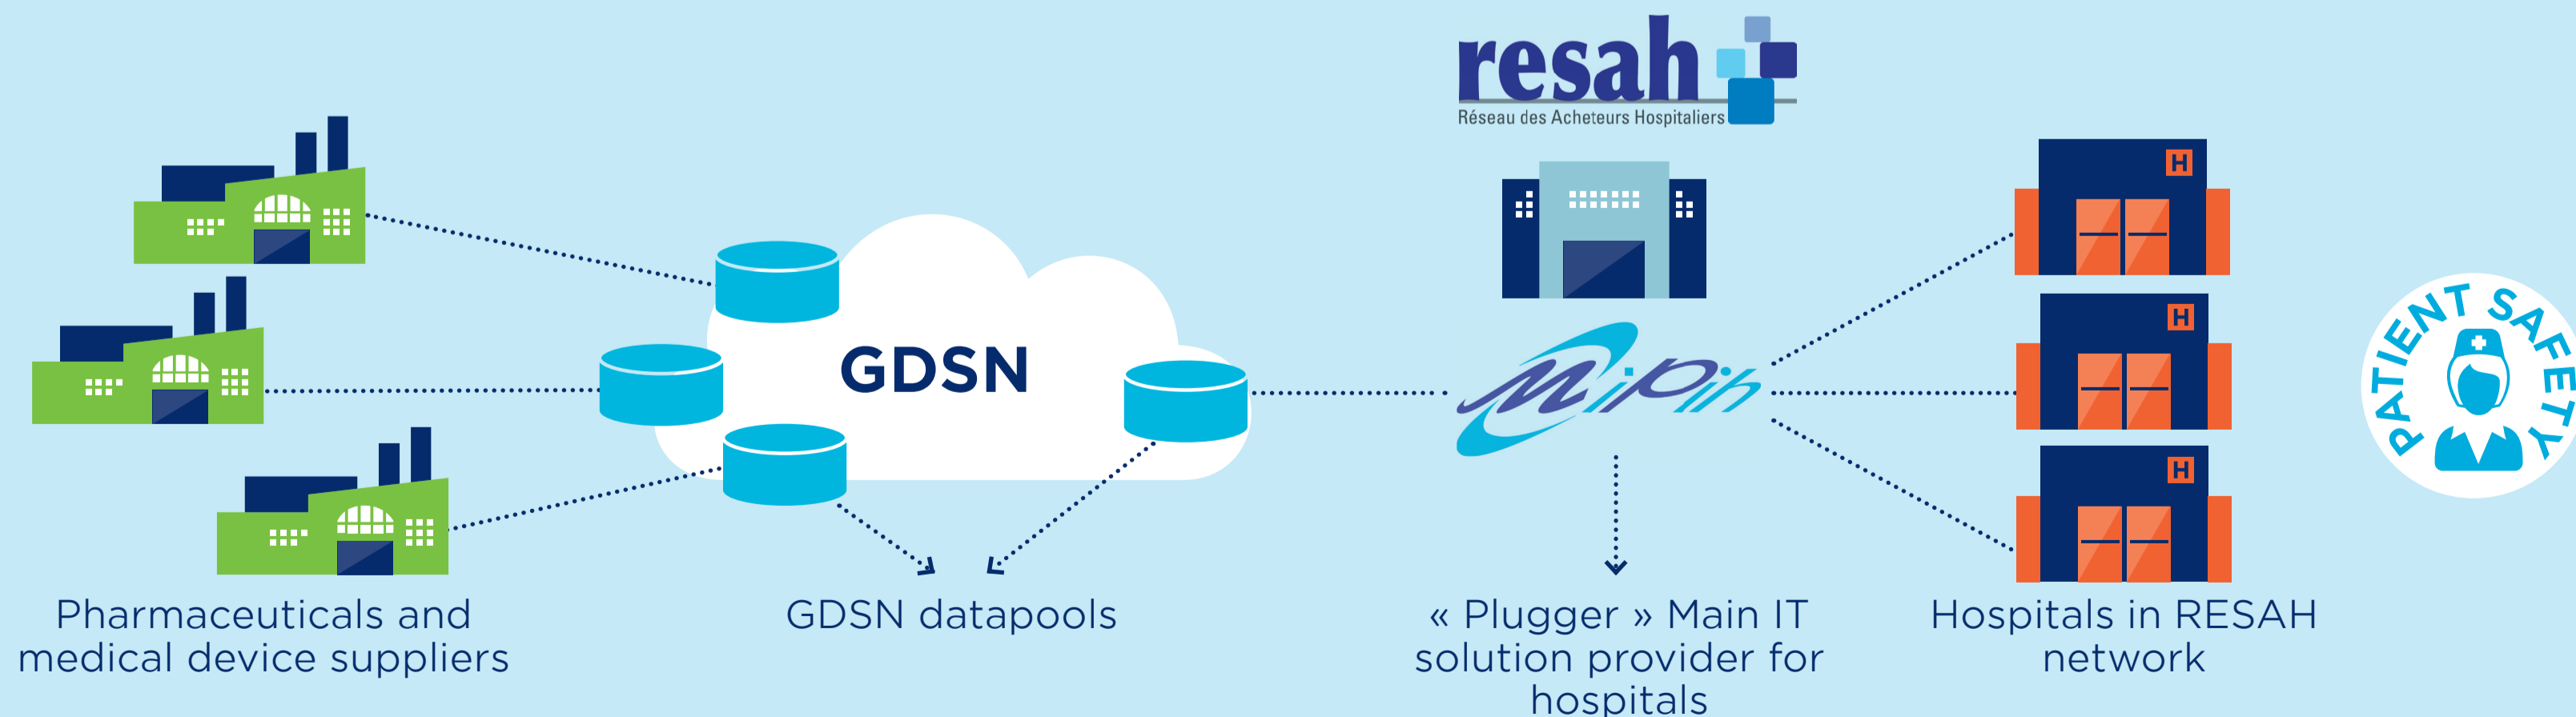

DANGER
PATIENT SAFETY AT RISK!
- Incomplete product data
- Outdated information
- Untrustworthy data
- Brand owner responsibility for data they did not provide

RESAH and MIPIH enable care providers to receive trustworthy data to reinforce patient safety
