What the
public policy database
CAN DO **for you**

GS1 Healthcare Public Policy Database

The database is a global repository of the latest requirements, related to healthcare product identification, product catalogues and traceability at national, regional and local levels. The database and documents are updated and verified by the GS1 Healthcare community and regulatory bodies which ensures the most accurate and current information from all over the world.

Allows you to:

- Access the key healthcare requirements **from all over the world:** regulation, tender, guidance, stakeholder agreement…

- Get an overview of the development, adoption and implementation of these requirements by country and/or region

- Access all supporting documents (draft, Q&A, explanatory slide deck, summaries, public submissions, translations…)

IN ONE SINGLE CONNECTION, ACCESS ALL THE HEALTHCARE REQUIREMENTS

Only accessible to GS1 Healthcare Global Members!
