GS1 Lib - Enabling Healthcare IT systems to become GS1 standards compliant

GS1
Hungary

GS1 Lib®

The e-version of GS1 Knowledge & GS1 Values

Benefits for Healthcare sector

✔ **Rules defined in Healthcare sector are implemented into GS1 Lib** in line with GS1 GenSpec. This allows the given partner from the Healthcare sector to carry out checks in accordance with local rules as well as creating standard identification numbers and data carriers on the basis of the rules.

✔ **Transparent, sustainable and cost-effective processes** in the healthcare supply chain.

✔ **Complex solution for hospitals and solution providers in healthcare sector,** by integrating into the ERP system of companies or mobile applications.

✔ Help to protect healthcare products and processes, **increase effectiveness and customer satisfaction.**

✔ Reference app for the sector: Healthcare Demo Scanner. Download the app now: it's available in AppStore and Google Play Store.

What is GS1 Lib?

✔ GS1 Lib allows the handling of national local rules complementing general rules of GS1 Standards.

✔ GS1 Lib is designed for a validation examination - checking the data, data structure, symbol and scanning environment.

✔ GS1 Lib is part of an SDK for various platforms and integration into various applications.
